788 776 778 defile, which winds up the hill-side and then suddenly emerges on a grassy table-land, the home of countless flocks of wild guinea-fowl. There are no villages or compounds on the summit, for, after the punitive expedition many years ago, the people were ordered to come down from the hill-tops and live in the valley.

776 778 The god itself, which is supposed to be an emanation of the Supreme Being, does not, as far as ~~I could~~ discover, possess any shrine beyond a natural temple in the form of a large rock cavern, where the service about to be described was held, and a rock altar, that may or may not have been natural, in front of a second cavity in the rock not very far from the first cave, the entrance to which was hung with filthy old rags. The altar was so smothered in fowls' feathers, which also lay more than ankle deep on the ground, that I could not be certain of its composition.

796 788 On the morning of the ceremony I reached the rocks below the first cave about 8 a.m. and found I was the first arrival. The Chief of Teŋ'zugu and the *Ten'dan'* had not yet appeared. From then onwards, until about 9 a.m., groups of pilgrims began to arrive. To my wonder [484] and astonishment I saw well-dressed Africans, men and women who I later discovered, had motored hundreds of miles from Kumasi, Kwahu, and Mampon. Among these were several of my Ashanti friends of old days, and never shall I forget the look of amazement on their faces at meeting me again in such a place. About 9 a.m. the Chief of Teŋ'zugu and the *Ten'dan'* arrived. The former was a really magnificent-looking man, standing well over six feet and very finely [777] proportioned. He was covered in amulets and fetishes, as was the *Ten'dan'* (see Figs. 73 and 74).

796 I told them (as we had indeed already arranged) that I would like to attend the ceremony and register my wish and make my vows. They asked permission to go forward and make preparation, and soon afterwards I heard the rhythmic clapping of hands, which was faintly audible to us below. All the pilgrims now began to undress. The Coast women disrobed and put on shorts; hats, shoes, white pith helmets, and clothes were piled up and scattered over the boulders (see Fig. 75). We were now called to come forward, and climbed up the rocks until we came to the low entrance of the cave (see Fig. 76). This we were asked to enter backwards. Soon the cave was packed so full that many were sitting on their companions' legs and laps. I know I had a person on each knee. Some one asked me to give my name and what I wanted. I asked Aboya, who was with me, to state the nature of my work; how I was trying to record their ancient customs, that the best of them

In marked contrast is the average person's ignorance of settlements, even near at hand, with which his clan has no close social bonds or with which he has no personal links of kinship or friendship. Tallensi acquire their knowledge of geography and natural history gradually in childhood, by direct experience. It is already well established by the age of 9 or 10, and grows *pari passu* with the expansion of the child's social space. The basis of this is the child's natal settlement, where, except for occasional visits to kinsfolk elsewhere, it spends its entire childhood. But even adults had little liberty of movement in the past, since they could hardly go unmolested in settlements unrelated to theirs by clanship or political ties or where they had no kinsfolk. Most of the older people have never been outside Taleland, and many of them have never, or only rarely, visited some of the settlements within an hour's walk of their own.

A Talɔŋ inevitably has a profound emotional attachment to his native settlement. It is striking how many Tale emigrants return home eventually after years of absence, casting aside the flesh-pots of Ashanti or the rich fields of Mampurugu. '*Kpala m-mah*—Here it is pleasant', they say, in spite of the penury of existence; for here are your kith and kin, here is the scene of your childhood joys and sorrows, and above all, the abode of your forefathers. The Talɔŋ's empirical knowledge of his habitat is the precipitate in his thought and experience of the economic and structural facts that determine the local fixity of his native settlement. His affective attachment to it finds an institutionalized expression and support in the ancestor cult.

Settlement Boundaries

The hub of Taleland is Tongo (see map on p. 15). This ancient settlement, geographically central and politically nodal in the network of interclan relations, provides a very good model of the structure of a typical Tale settlement.

As we know, the Tongo branch of Mosuor biis live in such close spatial and social propinquity with Zubiuŋ, Gbizug, and Zoo that these clans are often spoken of collectively as 'the people of Tongo (Tɔŋdɛm)'. For precision, Tongo proper is referred to as Tɔŋ-Nayiri—the Chief's House of Tongo—all over Taleland. Throughout the Mole-Dagbane-speaking region clans which hold a chiefship are thus identified by reference to it. Those which have tɛndaanas are sometimes called Tɛndaaŋ, on the same principle. Thus outsiders distinguish between Sie-Nayiri and Sie-Tɛndaaŋ.

Tɔŋ-Nayiri, Tongo proper, forms an irregular block of homesteads, somewhat less than three square miles in area and is one of the largest settlements in Taleland. It comprised, in 1934, 192 homesteads and a total population of about 2,400.[1] This does not include Tongo people

[1] Calculations, based on my own census samples and on figures kindly supplied to me by the A.D.C. Zuarungu, show that in Taleland the average number of people of both sexes and all ages occupying a homestead is 12 to 14. Owing to the variation in the constitution of homesteads this figure must be accepted with reserve; but it is sufficient for a rough estimate of population in a country where accurate statistics do not exist.

This aspect of the *Bɔyar* cult had great economic and social importance, in the past, for the Hill Talis. The pilgrims bring gifts of salt, cloth, hoes and so forth, nominally for the *Bɔyar*, that is, the Primordial Ancestor, who is believed to manifest himself in the oracular voice. Actually these gifts are secretly shared among the heads of the maximal lineages which own the particular *Bɔyar*. Nowadays these gifts are of small, though by no means negligible, worth, for all these commodities can be bought in any market, far more cheaply than in the past. But in the past they represented a valuable source of supply of scarce and highly prized goods.

Again, the visits of the pilgrims are annually reciprocated by a visit to the client village of representatives of the Talis lineage which is its sponsor with the *Bɔyar* to which it owes ritual allegiance. These ritual visits are made in order to consecrate local shrines representing the *Bɔyar*, to release pilgrims and children born to them from special taboos, and to perform the ritual shaving of the children by which they are formally placed under the spiritual guardianship of the *Bɔyar*. But these services are paid for in cowries and other gifts, and portions of the animals sacrificed are taken home and added to the meat supply of the sponsors. Young men go along on these ritual tours carrying fowls for sale in the client villages, and sometimes buy grain or yams in return.

The pilgrim traffic was, therefore, in former times an economic asset of the first importance as the Hill Talis and their neighbours themselves point out. It gave them also a wider range of social and cultural relationships than their own restricted community. People travelling to and from the Tong Hills on ritual errands carried the sacred emblems of the *Bɔyar* cult and were safe from molestation.

Some twenty years ago the pilgrim traffic took a new turn. Tallensi were coming into contact with Ashanti and the coast, and thus news of the Tong Hills 'fetishes' reached those areas. Men from the Hills, with a mixture of inborn business acumen and sincere faith in the magical powers of their oracle cult, advertised the cult quietly. A trickle of pilgrims from these wealthy and comparatively sophisticated areas began to flow northwards. And the trickle soon became a broad stream. Rich and poor, farmers, traders, chiefs, commoners, literate and illiterate, pagans and Christians joined the stream. To-day this traffic is a major industry of the Tong Hills.

These pilgrims[1] from the south come with extraordinarily varied wishes to lay before the *Bɔyar*. They beg for children, for health, for wealth, for power, for the success of farming and business enterprises, for victory in litigation, for help in a career or in the prosecution of political aims. Most important of all, Ashanti and Colony medicine men come to purchase the privilege of ritual clientship of the *Bɔyar*. They receive the right to

[1] I am indebted to Dr. M. J. Field, formerly Government Anthropologist, Gold Coast, for some information on the Colony end of this traffic. See also her *Religion and Medicine of the Ga People* for references to 'Nana Tongo' and her paper 'Some New Shrines of the Gold Coast and their Significance', *Africa*, xiii. 2, 1940. Rattray, op. cit., vol. ii, pp. 361 ff., gives a vivid description of the ceremony at the Tɔŋna'ab *Bɔyar* when hundreds of southern pilgrims come to present their pleas and register their vows.

602 The usual range of effective uterine kinship is a good illustration of the correlation between spatial relationships and genealogical relationships in the social space of the individual. The physical range of the individual's social contacts and communication with others is, as we have already noted, a function of his range of social relations, which is determined principally by his genealogical connexions. In the days before the establishment of the British peace, matrilateral, and especially uterine kinship, played a very important part in enabling people to travel outside their normal range of social contacts, and so to build up social relations with members of clans usually inaccessible to their own clansmen. A story will illustrate how this occurred.

602 574 484 When the Gorogo-Yikpɛmdaana was a young man of 17 or 18, sometime during the first decade of this century, a food shortage approaching famine, such as periodically swept the country, descended on the Tallensi. He decided to make a journey to Gbimis, in Mampurugu, across the White Volta, in order to barter some livestock for grain. But such a journey was full of peril. A Talǝŋ wandering in Mampurugu would be set upon and killed or taken as a slave by any armed Mamprusi who encountered him. So he went, first, to a *soog* at Pwalagu. This man escorted him across the river to another *soog* living in a small village there, and this *soog* conducted him to Gbimis. Under the safe conduct of his Mampuru *saarǝt* he was able to carry out his project. In later years he often made this trip to Mampurugu to buy things for resale in the small markets of Taleland.

Though people can travel where they will in freedom and security nowadays, it is still usual for anyone having business of a ritual or jural kind with a distant or unfamiliar clan to follow the web of uterine kinship thither. The route is much curtailed, but the principle remains. If Banǝrǝg's wife's brother, a Sakpee man, has such business at Bongo, he will probably go to his *saarǝt* at Zuarungu, stay the night with them, go on next morning to a *soog* at Yaraga, and find out from him or her if they have a *soog* at Bongo with whom he could stay and who will guide him and act as his spokesman with *his* clansmen.

602 476 431 In the same way uterine kin assist one another in economic matters. A man who loses time in his farming programme through illness will often ask a *soog* from a neighbouring settlement to come and do a day's hoeing for him where he would not ask for such help from a clansman. Again, crops do not ripen at the same time throughout Taleland. There may be an interval of several days or several weeks between the harvest at Sii and the harvest at Datǝk. It is the custom, at harvest time, especially at the time of the early millet harvest after the hungry months, for people living in areas that have a late harvest to 'beg (*soh*)' gifts of grain from relatives living in early harvesting areas. Later, when the early harvesting settlements have exhausted their supplies, people will go to kinsfolk in later harvesting areas to beg for grain to tide them
